## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2833

1. Claims 1-11 are objected to because of the following informalities:
  - On lines 1 and 3 of section *d.* of claims 1, 4 and 7, it appears that “plug locking mechanism” should be –plug lock locking mechanism–.
  - On the last line of claim 1, –receptacle– should be inserted after “signal”.
  - On line 2 of claims 3 and 5, it appears that “secure” should be –secured–.
  - On line 3 of claim 8, “mechanisms” should be changed to –mechanism–.

Appropriate correction is required.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1 and 2 are rejected under 35 U.S.C. 102(e) as being anticipated by James. The apparatus of James comprises a plug lock 62 rotatably secured about a first point 66, a plug lock spring 70, a locking release mechanism 90 rotatably secured at a second selected point at the lower end of lever 62, a plug lock locking mechanism 98, and an electromagnet (part of solenoid 94). It operates as claimed.

Art Unit: 2833

5. Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over James. As noted above, James discloses the structure of the apparatus for locking a plug. It does not specify that it be for use with a headphone. However, James does indicate that the connection may be any of various types of known connectors. James also indicates that the structure is to be used in situations where inadvertent disconnection is a problem. As this same problem is known to be present with headphones and audio signal receptacles, it would have been obvious to use the plug locking mechanism of James with headphones.

6. Claims 3, 5 and 6 are each objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

7. Claims 7-11 would be allowable if rewritten or amended to overcome the objections set forth in this Office action.

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Cable and Eads are further examples of rotatable plug locks for securing electrical connections.
